Mawingu Networks
- **Moderator** : Ryan Palmer
Global Digital Equity Strategist, Airband Initiative, Microsoft

STARRY INTERNET

VIRGINIA LAM ABRAMS

*Co-Founder and EVP,
Government Affairs & Strategic
Advancement*

ROBUST, AFFORDABLE, HIGH SPEED HOME BROADBAND IS ESSENTIAL

Starry was founded on the belief that broadband access empowers people and communities, creates economic opportunities, and powers the technologies we need to fully participate in modern society. In short, it is essential and far too many families go without it.

67%

of the U.S. broadband market is
controlled by cable incumbents¹

0

Average incumbent
Net Promoter Score³

- Starry built a new fixed wireless technology on a foundation of using licensed high-capacity millimeter wave spectrum to dramatically lower the costs of building a broadband network
- We use our proprietary technology to build gigabit networks across entire cities in months, not years
- Modern network architecture allows for exceptional customer experience, visibility, and response times

STARRY TITAN

**STARRY
TRIDENT**

Starry's proprietary tech delivers gigabit service from its base station sites, Starry Titan, to Starry transceivers—Starry Trident for large apartment buildings or Starry Comet for small apartment buildings and single-family homes

**STARRY
COMET**

In the US, digital redlining has created an unequal system of broadband haves and have-nots, deeply affecting public and affordable housing communities. In 2018, we launched Starry Connect to offer a low-barrier, high-value alternative for families who need it most

- ✓ No credit checks or equipment deposits
- ✓ No need to qualify for or participate in other federal assistance programs
- ✓ No extra equipment fees or installation fees
- ✓ No data caps
- ✓ No long-term contracts
- ✓ No long application process or long wait time
